DETAILED ACTION

Election/Restrictions

1. The previous restriction requirement mailed on 7/19/05 has been withdrawn. A new restriction requirement is set forth below.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-30 and 39-42 drawn to product, classified in class 257, subclass 254.
 - II. Claims 31-38 drawn to product, classified in class 438, subclass 52.
3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. In the instant case, the product as claimed can be made by another and materially different process such as a process does not require a first and second conductive adhesives joining a spacer to the cover and stiff major panel.

If applicant elects from Group I, then applicant must further elect from one of the following species set forth below:

Species of MEMS transducer devices:

A1. A transducer unit mounted on a board with a cover.

A2. A housing with non-conductive and conductive layers covering the transducer unit.

A3. A transducer unit mounted on a board with a recess and a cover.

A4. A cover with an inner lining.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 2-18, 20-23, 32-39, and 40 are generic.

Because these inventions are distinct for the reasons given above and acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
